

Targeted Solutions for Gastroenterology and Infectious Disease

Accuracy, Menu, and Throughput to Meet Your Demands

ALPCO offers targeted testing solutions¹ suitable for all types of labs. Our offerings range from plate-based to clinical chemistry analyzer-based and automated flash chemiluminescence solutions, all designed to accommodate your lab's expanding testing needs and capabilities.

EXTRACTION

Universal extraction compatible with multiple tests and platforms using the Easy 2 Stool Extraction Device

TESTING

- Plate based ELISAs
- Automated flash chemiluminescence (KleeYa[®])
- Immunoturbidimetric (Clinical chemistry analyzers)

RESULTS

- *Treponema pallidum*
- TDM Drug Level and Total Anti-drug Antibody
 - Adalimumab
 - Infliximab
 - Ustekinumab
 - Vedolizumab
- Calprotectin[Ⓢ]
- Pancreatic Elastase[Ⓢ]
- Lactoferrin[Ⓢ]
- *H. pylori* Stool Antigen[Ⓢ]
- *C. difficile* Toxin A/B
- *C. difficile* GDH
- Fecal Occult Blood
- EDN
- Secretory IgA
- Anti-Gliadin slgA

SPOTLIGHT: ALPCO Flash Chemiluminescence Assays for the KleeYa[®] Platform

The fully automated, sample-to-answer, random access solution for biomarker testing. Unlock the power of precision with the sensitivity and accuracy of ALPCO CLIA kits, seamlessly integrated into the efficiency of the KleeYa[®] platform. Together, they deliver reliable results with speed and confidence.

Features & Benefits

Get Accurate, Reproducible Results

Combine sensitivity and broad dynamic range through flash chemiluminescence detection.

Improve Turn-Around Time

Eliminate “batch” testing and easily prioritize specific samples and tests.

Reduce Reagent Costs

Run only 4 to 7 non-reportables per assay per day.

Increase Efficiency

Reduce hands-on time, operator errors and re-tests.

Expand Your Testing Menu

Select from routine assays and specialty tests.

Streamline Testing and Reimbursement

Test only what is needed, when it is needed.

Catalog Number: 15-10108093

Why Choose ALPCO?

SAMPLE TO RESULTS. SIMPLIFY COMPLEXITY.

Menu

Offering differentiated tests for a variety of GI needs, ALPCO's menu focuses on testing for GI disorders such as IBD, IBS, and pancreatic insufficiency, and Our expertise encompasses gastroenterology, diabetes & obesity, and endocrinology. Leveraging the comprehensive menu offered by ALPCO, institutions can easily bring testing in-house to help diagnose and monitor patients in a more timely way.¹

Performance

With tests like the Calprotectin CLIA, ALPCO offers some of the highest sensitivity and specificity values for IBD versus non-IBD testing. These tests combine the accuracy physicians expect with high reproducibility and reliability, allowing labs to confidently integrate them into their workflow.

Partnership

Since 1991, ALPCO has partnered with more than 20 global distributors, delivering innovative solutions in clinical diagnostics and research across the world. Our expertise encompasses gastroenterology, diabetes & obesity, endocrinology and infectious disease.

Growing Range of Assays²

Biomarker tests for intestinal inflammation, GI diseases/disorders, and infectious disease including:

- *Treponema pallidum*
- TDM Drug Level and Total Anti-drug Antibody
 - Adalimumab
 - Infliximab
 - Ustekinumab
 - Vedolizumab
- Calprotectin[Ⓢ]
- Pancreatic Elastase[Ⓢ]
- Lactoferrin[Ⓢ]
- *H. pylori* Stool Antigen[Ⓢ]
- *C. difficile* Toxin A/B
- *C. difficile* GDH
- Hemoglobin (iFOB)
- Eosinophil-Derived Neurotoxin (EDN)
- Secretory IgA
- Anti-Gliadin slgA
